PROFESSIONAL SUMMARY

Full-Stack Developer based in Nouakchott, building production web, mobile, ERP and business applications across Next.js, React, Laravel, Flutter, Supabase, PHP/MySQL and Dolibarr ERP. At MCS Consulting (Dec 2025 – Apr 2026), delivered custom Dolibarr ERP modules, built APOSB — a complete POS and commerce management system (sales, stock, invoices, partial payments, MRU reporting) on Laravel + React/Vite + MySQL + Docker for boutiques, supermarkets and businesses — and OMDHD, the official trilingual (AR/FR/EN, full RTL) institutional website for a Mauritanian NGO. Shipped Traiteurs to the App Store with three mobile-money rails (Bankily, Masrivi, Sedad) on a Supabase backend, and co-built AutoNetConfig — a Python + Nmap network-automation toolkit. Comfortable with REST APIs, SQL (PostgreSQL, MySQL), Git/GitHub, Docker and Linux. Bachelor's in Computer Networks & Telecommunications (ISCAE). CCNA, EVE-NG and Python certified.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Python, PHP, SQL
Frontend:	Next.js, React, Flutter, HTML, CSS, Responsive Design
Backend:	Node.js (via Next.js), Laravel (PHP), Flask, REST APIs
Databases:	PostgreSQL, MySQL, Supabase Postgres
Cloud & DevOps:	Supabase, Firebase, Vercel, Docker, Git, GitHub, GitHub Actions (CI/CD), Linux, Bash
ERP:	Dolibarr ERP (PHP / MySQL custom modules)
Networking:	TCP/IP, Routing, Switching, Network Automation, Nmap, EVE-NG, GNS3, Packet Tracer
Other:	UI/UX Optimization, REST API Integration, Row-Level Security, JWT / Auth, Unit Testing, Agile

PROFESSIONAL EXPERIENCE

Full-Stack Developer — MCS Consulting

Dec 2025 – Apr 2026

Nouakchott, Mauritania

- Delivered 6 custom Dolibarr ERP modules in PHP/MySQL covering the client → supplier → order → invoice → payment chain.
- Built APOSB — a complete POS and commerce management system (sales, stock, invoices, partial payments, user roles and MRU-based reporting) for boutiques, supermarkets and businesses, deployed with Docker on a Laravel + React/Vite + MySQL stack.
- Designed and delivered OMDHD — the official trilingual (AR/FR/EN, full RTL) institutional website for a Mauritanian NGO, built on Next.js 15, Tailwind CSS and Framer Motion.
- Integrated REST APIs, improved UI components and supported backend architecture, debugging and MySQL performance tuning using Git/GitHub on a Linux development environment.

Network & Systems Intern — Moov Mauritel

Jun 2025 – Aug 2025

Nouakchott, Mauritania

- Designed multi-router and multi-switch topologies in EVE-NG, GNS3 and Packet Tracer to validate routing and switching changes before production cutover.
- Co-built AutoNetConfig — a Python + Nmap toolkit that scans, visualises and auto-configures network infrastructure.
- Ran live network analysis, monitoring and troubleshooting on production-like topologies.

KEY PROJECTS

Traiteurs — Mobile Catering Platform

[App Store](#)

Flutter · Supabase · Bankily · Masrivi · Sedad

- Shipped a Flutter + Supabase catering platform supporting clients, caterers and delivery workflows.
- Integrated three Mauritanian mobile-money rails (Bankily, Masrivi, Sedad) with retry and idempotency handling.
- Designed the backend using Supabase Auth, Postgres, Storage, Realtime and Row-Level Security.

OxCoreX — Crypto Trading Platform

[Website](#)

Next.js · Supabase · PostgreSQL

- Built a full-stack crypto trading platform with wallet, KYC, referral system and admin dashboard.
- Designed the backend using Supabase Auth, Postgres, Row-Level Security and role-based access.

APOSB — Smart POS & Commerce Management System

[GitHub](#)

Laravel · React/Vite · MySQL · Docker · Reporting · POS

- Built a professional POS and commerce management system for boutiques, supermarkets and businesses, covering sales, purchases, stock, invoices, partial payments, users/permissions and MRU-based reporting.
- Delivered a premium business interface with reporting dashboards for daily sales, customer dues, product performance, inventory and cashier activity, with realistic Mauritanian demo data.
- Deployed the full stack with Docker for consistent, production-ready local and server environments.

AutoNetConfig — Network Automation Toolkit

[GitHub](#)

Python · Nmap · Networking

- Co-built a Python + Nmap toolkit for scanning, visualising and auto-configuring network infrastructure.
- Implemented Nmap-based discovery for hosts, open ports and topology mapping.
- Built infrastructure visualisation views to render discovered topologies and device relationships.

Sadara Media — Arabic News Platform

[Website](#)

Next.js · SSR · RTL

- Built an Arabic-first RTL news platform on Next.js with server-side rendering for SEO.
- Built a custom CMS for article drafting, publishing workflow, media uploads and category management.

OMDHD — Official Institutional Website

[omdhd.vercel.app](#)

Next.js 15 · TypeScript · Tailwind CSS · Framer Motion · Radix UI · next-intl

- Designed and built the official website for a Mauritanian NGO focused on human rights and social development, covering 15+ pages including news, reports, intervention areas, donation and volunteer pages.
- Implemented a native trilingual experience (Arabic, French, English) with full RTL support, smooth animations and responsive layouts across all screen sizes.

EDUCATION

ISCAE — Bachelor's Degree (Licence), Computer Networks & Telecommunications

2023 – 2026

Nouakchott, Mauritania

Baccalauréat Scientifique — Lycée d'Aioun

2021 – 2023

Aioun, Mauritania

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA), 2024
- EVE-NG Certification, 2025
- Python Programming — Udemy, 2025
