

05 — FINAL CV — VERSION 1/3: FULL-STACK DEVELOPER

Skill used: cv-master-rewriter-pro **Angle:** Full-Stack Developer (Web + Mobile + ERP) **Format:** ATS-friendly, single-column, plain text, English, 1-2 pages **Date generated:** 2026-05-18

Copy everything between the two horizontal rules into a clean Word/Google Doc using a single sans-serif font (Calibri / Arial / Helvetica, 10-11pt). Do **not** add tables, columns, icons or images.

ABDELLAHI AHMED AHMED BABA

Full-Stack Developer | Next.js · Supabase · Dolibarr ERP · CCNA Networking

Nouakchott, Mauritania | abdellahiahmedahmedbaba@gmail.com | +222 43638670

Portfolio: [your-portfolio-url] | GitHub: github.com/[your-github-handle] | LinkedIn: linkedin.com/in/[your-linkedin-handle]

PROFESSIONAL SUMMARY

Full-Stack Developer based in Nouakchott, building production web, mobile and ERP applications across Next.js, React, Laravel, Flutter, Supabase, PHP/MySQL and Dolibarr ERP. Currently shipping custom Dolibarr ERP modules at MCS Consulting and APOSB – a complete POS and commerce management system (sales, stock, invoices, partial payments, MRU reporting) built on Laravel + React/Vite + MySQL + Docker for boutiques, supermarkets and businesses. Earlier: shipped Traiteurs to App Store and Google Play with three mobile-money rails (Bankily, Masrivi, Sedad) on a Supabase backend, and co-built AutoNetConfig – a Python + Nmap network automation toolkit. Comfortable with REST APIs, SQL (PostgreSQL, MySQL), Git, GitHub, Docker and Linux. Bachelor's in Computer Networks & Telecommunications (ISCAE). CCNA, EVE-NG and Python certified.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Python, PHP, SQL
Frontend:	Next.js, React, Flutter, HTML, CSS, Responsive Design
Backend:	Node.js (via Next.js), Flask, REST APIs
Databases:	PostgreSQL, MySQL, Supabase Postgres
Cloud & DevOps:	Supabase, Firebase, Vercel, Docker, Git, GitHub, Linux, Bash
ERP:	Dolibarr ERP (PHP / MySQL modules)
Networking:	TCP/IP, Routing, Switching, Network Automation, Nmap, EVE-NG, GNS3, Packet Tracer
Other:	UI/UX Optimization, API Integration, Row-Level Security

PROFESSIONAL EXPERIENCE

Full-Stack Developer – MCS Consulting	Nouakchott, Mauritania
Present	Dec 2025 –
– Built [N] custom Dolibarr ERP modules in PHP and MySQL to fit business-specific	

workflows across clients, suppliers, orders, invoices and payments.

- Owned the full client → supplier → order → invoice → payment chain on Dolibarr, integrating REST APIs and reusing the existing ERP design system.
- Consolidated fragmented legacy modules into unified end-to-end commerce workflows, reducing duplicated logic and easing maintenance.
- Diagnosed and resolved production-side performance issues through code-level debugging and MySQL query tuning.
- Refined Dolibarr UI/UX on custom modules while preserving consistency with the existing ERP design system.
- Worked daily with Git, GitHub code review, and a Linux development environment.

Network & Systems Intern – Moov Mauritel
Mauritania

Nouakchott,

Jun 2025 –

Aug 2025

- Designed multi-router and multi-switch topologies in EVE-NG, GNS3 and Packet Tracer to validate routing and switching changes before production cutover.
- Co-built AutoNetConfig – a Python + Nmap toolkit that scans, visualises and auto-configures network infrastructure.
- Ran live network analysis, monitoring and troubleshooting on production-like topologies, isolating routing and switching faults end-to-end.

KEY PROJECTS

Traiteurs – Mobile Catering Platform (iOS & Android)

Flutter ·

Supabase · Bankily · Masrivi · Sedad

App Store: [add-link] | Google Play: [add-link]

- Shipped Traiteurs to App Store and Google Play – a Flutter + Supabase catering platform supporting three user roles (clients, caterers, delivery) with real-time order tracking.
- Integrated three Mauritanian mobile-money rails (Bankily, Masrivi, Sedad) with retry / idempotency handling on top of Supabase Realtime.
- Designed the backend on Supabase using Auth, Postgres, Storage and Row-Level Security to enforce per-role data access.
- Implemented an event pre-order system (weddings and similar) with date / slot booking, deposit handling and live order-status updates.

0xCoreX – Crypto Trading Platform

Next.js ·

Supabase · PostgreSQL

Site: [add-link]

- Built a full-stack crypto trading platform featuring wallet, KYC and referral systems with role-scoped access.
- Built an admin dashboard for user management, KYC review, transaction monitoring and platform configuration.
- Designed the backend on Supabase (Auth, Postgres, Row-Level Security, role-based access) to support a regulated-style trading workflow.

Sadara Media – Arabic News Platform (RTL, SSR)

Next.js · SSR

· RTL

Site: [add-link]

- Built an Arabic-first (RTL) news platform on Next.js with server-side rendering for

SEO, optimised for fast first-paint on mobile.

- Designed the editorial UI around a clear typographic hierarchy and Arabic-first reading flow, optimised for long-form articles.
- Built a custom CMS for editors with article drafting, publishing workflow, media uploads and category management.

AutoNetConfig – Network Automation Toolkit

Python · Nmap

· CCNA-level networking

GitHub: [github.com/\[your-handle\]/autonetconfig](https://github.com/[your-handle]/autonetconfig)

- Built a Python + Nmap toolkit that scans networks, monitors device status and generates configuration changes from scan results.
- Implemented Nmap-based scanning in Python to discover hosts, open ports and topology on demand.
- Built infrastructure visualisation views to render discovered topologies and device relationships for ops review.

APOSB – Smart POS & Commerce Management System

Laravel ·

React/Vite · MySQL · Docker · Reporting · POS

GitHub: github.com/AbdellahiAhmed/APOSB

- Built a professional POS and commerce management system for boutiques, supermarkets and small businesses, covering sales, purchases, stock, invoices, partial payments, users/permissions and MRU-based reporting.
- Delivered a premium business interface with realistic Mauritanian demo data and reporting dashboards for daily sales, customer dues, product performance, inventory and cashier activity.
- Deployed the full stack with Docker for consistent, production-ready local and server environments.

OMDHD – Official Institutional Website

Next.js 15 ·

TypeScript · Tailwind CSS · Framer Motion · Radix UI · next-intl

Site: omdhd.vercel.app

- Designed and built the official website for a Mauritanian NGO focused on human rights and social development, covering 15+ pages including news, reports, intervention areas, donation, volunteer and contact pages.
- Implemented a native trilingual experience in Arabic, French and English with full RTL support, smooth Framer Motion animations and responsive layouts across all screen sizes.
- Delivered a content architecture ready for CMS integration, with clean component structure and next-intl for seamless language switching.

EDUCATION

ISCAE – Bachelor's Degree (Licence), Computer Networks & Telecommunications
Nouakchott, Mauritania

2023

– 2026

Baccalauréat Scientifique – Lycée d'Aioun
Aioun, Mauritania

2021

– 2023

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA)
- EVE-NG Certification
- Master Python Programming: The Complete Beginner to Advanced – Udemy

LANGUAGES

Arabic (Native) · French (Professional) · English (Professional)

Placeholders left to fill (before sending)

- [your-portfolio-url] / [your-github-handle] / [your-linkedin-handle]
- [N] custom Dolibarr modules at MCS Consulting
- App Store + Google Play links for Traiteurs
- OxCoreX site link
- Sadara Media site link
- AutoNetConfig GitHub link
- Gestion Archivage site link
- Clinique El Ihsan site link

Notes on this version

- Lead with **Full-Stack** title; certifications and networks live in the body but don't compete with the headline.
- Projects are ordered by sales weight (Traiteurs → OxCoreX → Sadara → AutoNetConfig → Gestion Archivage → Clinique El Ihsan).
- "Skilled in modern web technologies" / "passionate about solving real business problems" deleted — replaced with named stack and named outcomes.
- "Mai 2026" replaced with "Present" since MCS Consulting role is current as of 2026-05-18.
- "Networks Informations" fixed to "Computer Networks & Telecommunications".
- 5-section structure: Summary → Skills → Experience → Projects → Education → Certifications → Languages — every section ATS-standard.
