PROFESSIONAL SUMMARY

Full-Stack Developer based in Nouakchott, shipping production software across web, mobile, ERP and network automation. At MCS Consulting (Dec 2025 – Apr 2026), delivered **6** custom Dolibarr ERP modules in PHP/MySQL and contributed to production web applications including a document management system, a bilingual medical website and an internal point-of-sale platform. Shipped Traiteurs to the App Store and Google Play with mobile-money integrations (Bankily, Masrivi, Sedad) on a Supabase backend. Co-built AutoNetConfig — a Python + Netmiko + Flask toolkit that SSH-configures Cisco-class equipment, scans hosts and ports with Nmap, and renders live topology views — designed and validated on EVE-NG. Comfortable across REST APIs, SQL (PostgreSQL, MySQL), Git/GitHub, Docker and Linux. Bachelor's in Computer Networks & Telecommunications (ISCAE). CCNA, EVE-NG and Python certified.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Python, PHP, SQL
Frontend:	Next.js, React, Flutter, HTML, CSS, Responsive Design
Backend:	Node.js (via Next.js), Python, Flask, REST APIs
Databases:	PostgreSQL, MySQL, Supabase Postgres
Cloud & DevOps:	Supabase, Firebase, Vercel, Docker, Git, GitHub, GitHub Actions (CI/CD), Linux, Bash
ERP:	Dolibarr ERP (PHP / MySQL custom modules)
Networking & NetDevOps:	Cisco CCNA, TCP/IP, Routing, Switching, Netmiko (SSH automation), Flask, Nmap, EVE-NG (primary lab), GNS3, Packet Tracer
Other:	UI/UX Optimization, REST API Integration, Row-Level Security, JWT / Auth, Unit Testing, Agile

PROFESSIONAL EXPERIENCE

Full-Stack Developer — MCS Consulting

Dec 2025 – Apr 2026

Nouakchott, Mauritania

- Delivered **6** custom Dolibarr ERP modules in PHP/MySQL covering client, supplier, order, invoice and payment workflows, while also contributing to production web applications and client-facing websites.
- Developed and maintained web projects including Gestion Archivage & Courier and Clinique El Ihsan, focusing on usability, responsive UI and structured data handling.
- Contributed to an internal point-of-sale web application currently under development, supporting commercial workflows and operational use cases.
- Integrated REST APIs, improved UI components and supported backend architecture, debugging and MySQL performance tuning using Git/GitHub on a Linux development environment.

Network & Systems Intern — Moov Mauritel

Jun 2025 – Aug 2025

Nouakchott, Mauritania

- Designed multi-router and multi-switch topologies on EVE-NG (primary lab) alongside GNS3 and Packet Tracer to validate routing and switching changes before production cutover.
- Co-built AutoNetConfig — a Python + Netmiko + Flask toolkit that SSH-configures Cisco-class equipment, scans hosts and ports with Nmap, and serves a real-time topology visualisation layer.
- Ran live network analysis, monitoring and troubleshooting on production-like topologies built on EVE-NG.

KEY PROJECTS

Traiteurs — Mobile Catering Platform

[App Store](#)

Flutter · Supabase · Bankily · Masrivi · Sedad

- Shipped a Flutter + Supabase catering platform live on the App Store and Google Play, supporting clients, caterers and delivery workflows.
- Integrated Mauritanian mobile-money rails including Bankily, Masrivi and Sedad.
- Designed the backend using Supabase Auth, Postgres, Storage, Realtime and Row-Level Security.

OxCoreX — Crypto Trading Platform <i>Next.js · Supabase · PostgreSQL</i> - Built a full-stack trading platform with wallet, KYC, referral system and admin dashboard. - Designed the backend using Supabase Auth, Postgres, Row-Level Security and role-based access.	<u>Website</u>
AutoNetConfig — Network Automation Toolkit <i>Python · Netmiko · Flask · Nmap · EVE-NG</i> - Co-built a Python + Netmiko + Flask toolkit for SSH-driven configuration, discovery and live topology visualisation across Cisco-class equipment. - Automated configuration push over SSH with Netmiko; used Nmap for host, port and topology discovery. - Built a real-time Flask web layer to render discovered topologies and device relationships, designed and validated on EVE-NG labs.	<u>GitHub</u>
Sadara Media — Arabic News Platform <i>Next.js · SSR · RTL</i> - Built an Arabic-first RTL news platform on Next.js with server-side rendering for SEO. - Built a custom CMS for article drafting, publishing workflow, media uploads and category management.	<u>Website</u>
Gestion Archivage & Courier — Document Management System <i>Web · Search · RBAC</i> - Built a document and mail management system for administrative teams with search, classification and tracking. - Designed structured data handling with role-based access and audit-style document fields.	<u>Website</u>
Clinique El Ihsan — Bilingual Medical Website <i>FR/AR · RTL · Responsive</i> - Built a bilingual French/Arabic medical website with appointment-request and contact systems. - Designed a mobile-first responsive UI optimized for low-end devices and slower connections.	<u>Website</u>
EDUCATION	
ISCAE — Bachelor's Degree (Licence), Computer Networks & Telecommunications <i>Nouakchott, Mauritania</i>	2023 – 2026
Baccalauréat Scientifique — Lycée d'Aioun <i>Aioun, Mauritania</i>	2021 – 2023
CERTIFICATIONS	
- Cisco Certified Network Associate (CCNA), 2024 - EVE-NG Certification, 2025 - Python Programming — Udemy, 2025
