ABDELLAHI AHMED AHMED BABA

Software, Network & Security Engineer · Building, running and securing the systems businesses depend on

Tunis, Tunisia · abdellahiahmedahmedbaba@gmail.com · +222 43638670

abdellahiahmed.vercel.app · github.com/AbdellahiAhmed · linkedin.com/in/abdellahiahmedahmedbaba

PROFESSIONAL SUMMARY

Engineer who covers a chain most companies split across three teams: the business software, the network it runs on and the security around both. Takes a system from the first client meeting to daily use — understanding the need, designing the data, building, deploying, backing up and training users — and stays accountable once it is live. In production today: **SOMAP RH**, used every day across a national fuel-station network; order tracking for **CAMEC**, Mauritania's central medicines agency; and **OpticOS**, a subscription platform for optical shops, from multi-shop sales and stock to eye prescriptions, in French and Arabic. Network and payment-system experience at Moov Mauritel and A2 Holding; Master's in Information Systems Security in progress. Arabic, French and English.

CORE EXPERTISE

Software engineering: business analysis, data modelling, APIs, web and mobile apps — React, Next.js, TypeScript, Laravel, PHP, Flutter, MySQL, PostgreSQL, Dolibarr ERP

Networks & infrastructure: routing and switching (CCNA training), network automation in Python, EVE-NG labs, Linux servers, Docker, deployment and hosting

Security: role-based access, two-factor authentication, audit trails, encrypted backups, data isolation between clients, payment integrity

Delivery: working with non-technical clients, automated testing and CI/CD (Playwright, GitHub Actions), AI-assisted development under strict review, user training and documentation

PROFESSIONAL EXPERIENCE

Full-Stack Developer — MCS Consulting Dec 2025 – Present

Nouakchott, Mauritania · Remote from Tunis since Sep 2026

- Own client projects end to end, from the first meeting to daily use and production support, working directly with managers and end users.
- Built **SOMAP RH**, the HR and payroll system used every day across SOMAP's fuel stations, gas depots and agencies.
- Designed, built and launched **OpticOS**, the company's subscription software for optical shops, from specification to production; run its production: releases, daily encrypted backups and rollback plans.
- Built a land-portfolio platform, a point-of-sale system and **6** custom ERP modules, including international order tracking for **CAMEC**.

Full-Stack Developer & Network Engineer Intern — A2 Holding Jul 2026 – Aug 2026

Nouakchott, Mauritania

- Owned the company's complete payment system end to end, in a group that is both a software company and an internet service provider.
- Contributed to the design of the group's in-house mobile application.

Network Administration & Automation Intern — Moov Mauritel Jun 2025 – Aug 2025

Nouakchott, Mauritania

- Designed and tested network setups (routers and switches) in virtual labs before changes went live.
- Co-built AutoNetConfig, a tool that configures network equipment automatically, backs up its settings on a schedule and maps the network live.

KEY PROJECTS

SOMAP RH — HR & Payroll System Live: somap-grh.com

In daily use across SOMAP's fuel stations, gas depots and agencies

- Employees clock in from their phone at their workplace; HR manages leave, salary advances and absences in one place.
- Payroll is calculated every month with each deduction explained on the payslip; management follows attendance and payments on clear dashboards and receives a daily presence report on WhatsApp.
- Built to be reliable with money: a payment can never be made twice, and every change is recorded.

OpticOS — Management Software for Optical Shops Live: opticos-mr.com

Subscription software for optical shops · Live since November 2026

- Gives an optical shop one place to run its day: counter sales, customer prescriptions and glasses orders with the date promised, stock and suppliers, the cash register and the month's profit.
- Serves many shops on one platform, each with its own private data; available in French and Arabic and on a phone; every payment is recorded and the software is checked automatically before each update.

CAMEC — International Order Tracking Live: camec-mr.com

Delivered to CAMEC, Mauritania's central purchasing agency for medicines

- Replaced the Excel files used to follow international orders with a clear step-by-step process, from the purchase order to final delivery.
- Automatic delay alerts, required documents for each shipment, supplier reminders and a dashboard of the agency's key indicators; delivered with user guides and a full acceptance test with the client.

Land Portfolio Management Platform Live: osn-mr.com

Built for a client managing a land portfolio

- A complete view of every parcel: how it was bought and paid for, the projects built on it, expenses, mortgages and sales through to the final profit.
- Executive dashboard and one-click reports in Excel and PDF; each user sees only what their role allows, and financial records are never deleted.

Traiteurs — Catering & Delivery App Live: App Store

Mobile app on the App Store and Google Play

- Connects customers, caterers and delivery drivers, with payment by Bankily, Masrivi and Sedad and live delivery tracking on the map.
- Led the development in a small team and built the admin console the operations team uses every day.

Also delivered

- **OxCoreX** (oxcorex.com) — crypto investment platform: Arabic mobile web app and English admin panel, with deposits, withdrawals, identity verification and referrals.
- **OMDHD** (omdhd.com) — official website of a Mauritanian human-rights NGO in Arabic, French and English: news, reports, donations and volunteering.

EDUCATION

Master's in Information Systems & Infrastructure Security — ISI, Tunis 2026 – Present

Bachelor's in Computer Networks & Telecommunications — ISCAE, Nouakchott 2023 – 2026

Scientific Baccalaureate (Mathematics) — Lycée d'Aïoun, Mauritania 2023

CERTIFICATIONS & LANGUAGES

Certifications: CCNA Training — III-Networking, 2024 · EVE-NG Training, 2025 · Python — Udemy, 2025
